WARNING

You climb at your own risk. Climbing is a dangerous activity carrying the risk of serious injury or death. If you climb, the presumption is that you are aware of and accept these risks together with responsibility for your activities and your safety. You are the sole judge of conditions, the suitability of any chosen route, the ability of the party and you take sole responsibility for your actions. Rock is a dynamic medium and rockfalls are frequent. In the mountains the weather changes quickly, climbs change unpredictably; blocks, flakes and holds become loose and fall off, rock becomes vegetated and dirty, in situ gear deteriorates or disappears. Even a minor change can have a dramatic effect on the difficulty or seriousness of a route. There can be no presumption that any given climb will be found in the condition described. It is therefore essential that climbers judge the seriousness or difficulty of any route before committing themselves.

While every effort is made to present accurate information, the descriptions, grades and comments provided in this guidebook are compiled from a number of sources. They may contain errors, are subjective or may have changed and should not be relied on. Neither the FRCC nor anyone involved with the production of this guide can be held responsible for any inaccuracies, omissions or mistakes, nor liable for any personal or third party injuries or damage, howsoever caused, arising from the use of this information.

FRCC GUIDES

Instructions for downloading and printing.

The mini-guides and crag pdfs can be downloaded to your smartphone or tablet

1. click on the link <https://www.frcc.co.uk/mini-guide-downloads/>
2. scroll through the menu
3. select the pdf you want by clicking the link
4. a new window opens with the contents of the pdf
5. on your computer select Print or Export and print or save the pdf
6. on your smartphone or tablet choose send and choose a destination

Printing

A5 pdfs can be printed 2 pages side-by-side on A4 paper.

Each crag starts at the top of a new page so, to save paper and ink, you can choose which pages (Craggs) to print.

To keep you informed and updated we are publishing crag and mini-guides to the area. Our pdfs are constantly updated to provide accurate and up to date information about new developments in the Lakes. All of this information is collated by volunteers from the FRCC Guidebook Team. These downloads supplement our comprehensive and selected guidebooks:

FRCC WIRED GUIDES

- Lakes Sport & Slate
- Lake District Rock

FRCC GUIDES

- Dow & Coppermines
- Langdale
- Borrowdale
- Eastern Craggs
- Eden Valley & South Lakes Limestone
- Duddon & Wrynose
- Buttermere & St Bees
- Gable & Pillar
- Lake District Winter Climbs
- Scafell & Wasdale
- Eskdale

Yewdale

Dirty, disregarded dystopia... Towering tantalisingly above the trees on the rough northern side of the valley, overlooking the main Coniston to Ambleside road are a series of impressive crags. You would imagine that the climbing matches the promise. Generally sunny, close to the road and with a great outlook this proximity betrays the steepness of the approaches, verdant impenetrable woods, dirty rock and unreliable protection. Perseverance will find rough rock with the added benefit that you are unlikely to meet anyone else climbing. This is a valley for extreme esoterica and incorrigible route baggers.

Yewdale Map

Yew Pike

OS Ref: **SD 302 984**

Alt: **310m**

With aerial views of Coniston this collection of small buttresses lies on the rugged fellside rising steeply above Coniston Holly How Youth Hostel. The largest crag slants diagonally up to the right in two tiers topped by a round knoll on the skyline.

Grades

Approach

From the Coppermines Road where it crosses the cattle grid. A grassy trod, virtually impossible to locate in long bracken, runs up and diagonally rightwards, at one point threading its way between boulders on a green shelf, Pate Bield. The boulders offer a variety of middle grade problems with forgiving landings. Continue up scree, bearing slightly right and steepening below the second band of cliffs.

Lower Tier

Introduction

There's potential for more routes here, if only it wasn't so dirty and vegetated! And with little prospect of becoming popular it is probably best to leave nature alone.

Two unpleasant routes are known - **Rudyard Grooves 30m S** [1960's] and **Grooved Wall 25m HS** [1961].

Slabby Buttress

Lat/Lng: [57.471584103291, -11.707668942398](#)

Introduction

A natural climbing wall for medium grade climbers, with reliable protection and belays on a clean pillar of rough rock, undercut across its base. The ground below the crag falls steeply away with a cam placement available for a belay.

Yew Crag - Slabby Buttress

1 **Sunshine Arête VS 4c** † 30m

A rewarding climb. Start 2m left of lowest point of the buttress at a short clean crack. Climb the crack for 3m, moving up and right onto the left edge of the buttress. Follow the arête in a great position.

19.04.2009 M Scrowston, J Loxham

2 **Sunshine Boys S** 30m

An excellent climb on rough rock. Strenuously left over a bulge in to the start of a crack which is followed on excellent holds to the top.

26.04.1993 AH Greenbank, FE Davies

3 **Walter Matthau VS 4b** 20m

Pleasant climbing up the steep central corner. Make an awkward move into the base of the corner. Surmount the bulge and immediately step right onto a good foothold on the rib. Climb this to a mantelshelf; finish up the easy crack.

19.05.1993 AH Greenbank, FE Davies

4 **George Burns VS 5a** 18m

A tough-looking line taking the jutting wall at the right-hand end of the buttress. A large handhold helps the steep initial moves from the steeply shelving fellside onto the wall. Continue up steeply then climb through a breach in the roof to the glacia above and final short wall; belay on the ledge above.

19.05.1993 AH Greenbank, FE Davies

Upper Tier

Approach

The Upper Tier lies above the descent from **Slabby Buttress**

Yew Crag - Upper Tier

1 Longhorn S 55m

A dismal route, starting from a partly detached block at the left-hand end of the crag. Climb a dirty groove and continue up cracked slabs.

1960s

2 Horn Route HVS 4c 40m

A bold lead up the centre of the main wall on flat clean holds with spaced protection. Start a few metres below and left of the concave wall. Climb directly to a detached block at 6m. Move up high into a left-slanting scoop before stepping left onto the edge of the wall (crux). Continue directly to the top on lichenous rock.

1954 LA Montgomery, J Richards

3 Graeme's Cheesecake HVS 5a 35m

A bold route with gear well below the crux. Start 1m right of *Horn Route*. Climb up to a detached block at 6m. Delicately move up and right to a tiny spike. Traverse right past this (crux), up to ledges and a finish up the obvious wide crack above.

R Pugh, F Bowra

4 Raging Horn E3 5c 20m

A sustained pitch on good rock starting from a conspicuous crack to the right of the concave wall. Slow to dry; small wires are needed but awkward to place. Climb the crack on sloping holds to the overhang. Step left with difficulty to a good hold, then follow twin cracks above to finish.

5.05.1993 J Bumby

Rigg Head

OS Ref: **SD 302 988**

Alt: **290m**

Grades

A small square buttress with a couple of worthwhile routes.

Approach

From the end of the metalled Coppermines Road turn right through the gate on to the track behind the Youth Hostel and then left at the finger-post on to the Rigg Head Beck path, which can be buried in bracken in summer. The crag can soon be seen jutting out on the skyline.

Rigg Head

20 min Aspect: **South East** 

Lat/Lng: [57.519686198032, -11.552582492025](#)

1 Interesting Crack HD 15m

Start behind a large boulder embedded in the fellside and follow the line of weakness into the wide broken chimney and so to the top.

08.1917 W Whinnerah, G Basterfield, S Wright

2 La'al Willie S 4a 16m

An exciting excursion, starting 8m left of *Trinity Crack* just left of overhang. Climb heathery cracks and ledges for 4m until it is possible to traverse easily right to the arête. Climb the arête to the top.

04.01.1992 A Phizacklea, JL Holden

3 Wilderness Disco E4 6a 15m

A technical climb with *in situ* gear on the wall to the left of *Trinity Crack*. From the grass ledge move diagonally left (cam) undercut up right (poor peg in situ). Reach a good handhold (poor RP); a hard move diagonally right leads to better holds (peg placement). Move left (poor peg placement) to the arête.

16.08.1997 I Wilson

4 Trinity Crack HS 20m

An old classic. The prominent corner gives a climb of great character. If the bottom tier is vegetated the route can be started by walking in from the right. A short right-angled groove leads to the grass ledge below the main corner. Climb this by tight chimneying, or whatever technique works, to the top.

08.1917 W Whinnerah, G Basterfield, S Wright

Hidden Crag

OS Ref: **SD 304 986**

Alt: **190m**

Grades

2

A small scruffy crag which would be ignored if it wasn't for its ridiculously overhanging wall.

Approach

It lies 200m left of [Mart Crag](#) at a slightly lower level, and is almost hidden from view by a large tree. Strike directly up the hillside towards the crag from the path leading to [Mart Crag](#).

20 min Aspect: **South East** 

Lat/Lng: [57.526678066396, -11.218499005568](#)

1 Crack Behind the Tree above Coniston E5 6b † 12m

One of the steepest routes of its length in the Lakes. Start behind the tree at the left-hand end of the crag. Avoid the obvious friable crack by using jugs on the left wall. The short groove provides the crux (peg).

15.06.1990 T Walkington

2 Fabian E4 6a † 12m

Start 3m right of the previous route. A groove leads (in-situ wire) to a cramped ledge at 6m. Step left and continue up the groove and steep wall to a high step onto the slab above. Alternatively swing right from the ledge onto a slab for an easier finish.

09.07.1990 T Walkington

The slabby buttress above [Hidden Crag](#) gives two routes; **Left Arête [60m D 1998 R Graham]** and **Central Scoop [60m VD 1998 R Graham]**. Approach by scrambling to the start of [Crack Behind the Tree above Coniston](#), then move left onto the hillside and scramble to the start of the routes.

Mart Crag

OS Ref: **SD 305 989**

Alt: **200m**

Grades

Lies on the steep fellside above the Coniston to Ambleside road.

Most of the routes start from the tree. The left-hand side of the crag is loose and broken.

There is a steep central wall bounded on its right by a rightward-sloping crack and a prominent corner, which is just up and left of the tree. A mossy glacis runs across the base of the central wall; the first four routes start at the right-hand end of this.

Approach

From the point where the road emerges from Whins Wood. Parking here. Walk through the woods and climb the drystone wall then a steep diagonal route leads to the crag. Step right below the crag to a perch behind the tree.

Mart Crag

30 min Aspect: **South East** 

Lat/Lng: [57.56532704762, -11.060254358723](#)

1 Boulder Buttress HVS 5a 49m 

Enjoyable in parts but vegetated.

1 24m 4b Traverse horizontally left across the delicate mossy glacia for 8m. A short corner leads onto a slab, now continue trending leftwards below the central wall to a sloping ledge.

2 12m 5a Climb the corner for about 5m to a ledge. Make a bold delicate traverse rightwards to a large grass terrace.

3 13m 4c Climb over the bulge into a steep groove; finish up the groove.

05.04.1969 JA Austin, R Valentine, DG Varley

2 The Mutant King meets the Humanoid E5 6a 30m

A very direct and difficult line. Four metres left of *The Bride* climb straight up the wall crossing *The Bride* (runners) and continue (Rock 2) up the very clean stunning arête.

3 The Bride E2 5c 45m

This steep bold route, clean in places, follows the flake across the central wall.

1 33m 5c From the start of the glacia, follow an awkward left-slanting gangway to the flake. Climb the flake to its top, step left, and continue up the difficult moss-coated crack to reach a large grass ledge.

2 12m The broken open groove behind the belay.

07.07.1976 CW Brown, B McKinley

4 Diamond Buttress HVS 5a 37m

An interesting climb, though rather mossy in places. From the glacia, as for *The Bride*.

1 12m 5a Climb the narrow left-slanting gangway for about 5m, until a shallow scoop on the steep wall to the right can be entered and climbed to a grass ledge below the corner (old peg).

2 12m Climb the very mossy slab on the right of the recess and step left onto a glacia.

3 13m 4b Finish up the steep cracks above.

20.04.1969 JA Austin, M Mortimer, AH Greenbank

5 Clean Sweep E3 5c 41m

A bold climb with sketchy protection tackling the prominent corner which starts halfway up the centre of the crag. Start below a steep blunt rib, just left of the tree.

1 13m 5b The poorly protected steep rib and short V-groove lead to the grass ledge of *Diamond Buttress*.

2 15m 5c Climb the steep corner behind the belay with some difficulty (small wires) to a large ledge.

3 13m 4b A short slab and groove provide an easier finish.

28.04.1985 K Phizacklea, J Daly

6 Caravan Slab VS 4b 36m 

Dire as, apart from the first 10m, this route suffers from an unusually lush covering of moss. Start directly behind the tree. Follow the rightward slanting slab and continuation grooves.

05.04.1969 JA Austin, R Valentine, DG Varley

7 Little Gem VS 4c 23m

Unpleasant climbing up a flared slot to the right of a mossy corner, about 15m to the right of [Caravan Slab](#).

The slot is reached by climbing diagonally leftwards past heather patches. Avoid the dirty first section on the right and exit rightwards to finish.

20.04.1969 JA Austin, M Mortimer, J Mortimer, AH Greenbank

Orange Wall

Grades

2

Between [Mart Crag](#) and [Yewdale Crag](#), and just right of the cascades, a short overhanging orange coloured wall may be found.

30 min Aspect: **South East** 

1 Allen Exit E3 5c 9m

A steep strenuous pitch climbing the left-hand arête of the overhanging wall, protected by a No.4 cam. Climb up just left of the arête for 4m, then pull right and follow the arête to the top.

07.1993 G Sutcliffe, T Henson

2 Agent Orange E3 5c † 15m

Climb the orange groove on the right of the overhanging wall.

6.08.1984 M France, J Evan

Yewdale Crag

OS Ref: **SD 309 991**

Alt: **190m**

A steep, apparently slabby, outcrop on an elevated spur with idyllic views. The crag lies just above the Coniston to Ambleside road, about 1½ km north of Coniston.

Grades

Approach

Park in Coniston; walk north along the road on the footpath. It is probably best to visually locate the crag before parking. Leaving the path, a steep approach up the fellside brings one to a comfortable haven beneath the main overhangs of the crag. Worthwhile for a short day or evening.

Descent

Descent is to the left (south).

Yewdale Crag

20 min Aspect: **South East** Lat/Lng: [57.629143352773, -10.403022228178](#)**1 Starstruck E1 5b** 42m 

An entertaining route which is strenuous and bold in places, but never technically exacting. Start 5m right of the highest point of the rake, below a steep crack which splits the overhangs above.

1 15m 5b Pull over the introductory bulge to gain the crack. Follow it rightwards through the roof on good holds, until a final move lands one on the slab above. Traverse the slab rightwards for 6m to a recess.

2 27m 5b Move up and across the slab and continue diagonally rightwards to good holds beneath a bulge. Make a long reach leftwards, over the bulge, and continue up walls following a rising traverse line.

17.05.1978 | Cooksey, M Danson

2 Dusk VS 4b 39m 

A good route which gives exciting climbing up steep rock on excellent holds. Start beneath the right-hand end of the band of overhangs and follow an indistinct groove which slants up to the right.

1 30 m 4b The initial wall is climbed via a steep groove to a mossy slab and sapling; move right, then up to a ledge beneath the groove. Follow this on good holds to a steep move over a bulge and easier ground. Belay on ledges to the right.

2 9 m The slabs above.

31.08.1966 D Miller, D Kirby

3 Dawn VS 4c 39m

A rather pointless route, starting from a grass ledge 9m right of *Dusk*. Pull directly into a short mossy right-facing corner, formed by a detached block and swing out left. Move up and back right across a slab and pull up to a bulge. Follow a gangway diagonally right for a couple of metres until a move can be made leftwards into a groove. Follow this over a prominent dark overhang to easier ground.

Autumn 1968 JR Martindale, KG Williams

4 Original Route S 42m 

A poor vegetated route. Follows a line some 20m right of *Dawn*. Climb to a birch tree at 10m, move up and right then back left, avoiding bulges, and back right along a mossy slab.

31.03.1962 L Bell, D Jewell, D Miller

A large vegetated buttress lies about 200m to the right and higher up the fellside than [Yewdale Crag](#). It is bounded on its left by an overgrown gully: Truly a botanist's paradise.

5 Creeping Jane HVS 5a 45m

This poor route follows a groove to the right of the large overhang. Start at the left side of the buttress. From some birch trees, traverse to the right for a couple of metres and then move up and traverse delicately to the left across the slab to gain the groove. (Poor thread; peg just above to the right.) Follow the groove, passing over an overlap, to a long ledge. Climb the obvious clean groove to tree belays.

Variation start 18m A couple of metres up the gully from the original start, the mossy slab can be climbed, trending left (old peg), to reach the long ledge (thread and peg).

Summer 1972 MR Myers, CW Brown

Raven Crag

OS Ref: **SD 312 002**

Alt: **200m**

This steep compact sheltered wall of fairly sound rock lies close to the road - sounds ideal. Deterred by a lustrous layer of moss, deceptive steepness and unreliable protection it is undeniably disconcerting, unpopular with climbers and justifiably neglected. Added to this, during the nesting season climbing here can be restricted.

There is scope with a considerable amount of unclimbed rock, so there may yet be a revival at Raven. The best view point is from some boulders across the scree to the right.

There is often a bird nesting restriction on this crag, please check the BMC RAD or the FRCC website for latest access information.

Approach

The lower section of the crag slants diagonally up the hillside and is impressively steep, with many overhanging sections. The upper section lies back at an easier angle, which makes it a more suitable home for the grass and heather.

The crag is situated to the right of a prominent ridge, [The Ridge](#) a classic scramble, which guards the entrance to the valley leading to Tilberthwaite and Hodge Close.

Descent

Walk uphill until the crag peters out and walk round to the base.

Raven Crag

20 min Aspect: **South East** 

Lat/Lng: [56.860106444758, -9.8828170635315](#)

1 The Ridge M 120m

The rough rocky ridge starting just above the road is a superb scramble, and an ideal place to introduce the fundamental techniques of climbing. Difficulties can be found or avoided at will.

2 Chrysalis HS 57m

Dirty. Start at the left (lower) end of the crag, below an obvious clean cut gangway which slants up to the right.

1 15m Gain the gangway and follow it until a step down to a grass ledge with a small tree can be made.

2 18m Step back on to the gangway and traverse horizontally left for 5m across the steep wall, to a spiky arête. Follow this to a grassy recess, and take the small gangway on the right, then climb directly to a grass ledge.

3 15m Climb up into the corner above until it is possible to move right (crux). Ascend more easily to a grass ledge and a larger ledge 6m higher.

4 9m Climb the wall at the back of the ledge via a break that inclines to the right.

07.05.1966 D Miller, D Kirby

3 Josie's Jog VS 4c 54m

The meat of this climb is the steep bold wall with a black niche, left of a steep corner, above and left of a holly tree. Start behind the tree.

1 27m 4c Climb diagonally left to reach a large grass ledge. Tackle the wall, moving rightwards into the niche. Exit steeply, and follow holds up and left, round the corner, to a ledge.

2 15m Move right, round the corner, using the detached flake; continue directly to large ledges (as for *Chrysalis* pitch 3).

3 12m From the right-hand end of the ledge, climb the arête to a terrace.

July 1964 M Stanton, J Connell

4 Tarantula VS 4c 45m

Wanders around searching for easier ground. Start behind the holly as for *Josie's Jog*.

1 18m 4b Ascend diagonally left to a grass ledge, and pull over a bulge into a shallow corner. Move up and step right to a ledge, then traverse horizontally right below the overhanging wall into the grassy groove of *Cobra*. Belay on the large block to the right.

2 15m 4c Move left and climb the groove to a steep headwall, with a nest on the right. Climb left across an exposed diagonal break. Belay on ledges above.

3 12m The corner to higher ledges.

05.03.1960 AC Cain, D Francis

5 Scary Canary E7 6c

An intimidating line with some wild and powerful climbing on the overhanging wall between *Electrolysis* and *Josie's Jog*. Head up and left to the base of the wall. Arrange protection here (there isn't much), before committing upwards to a conspicuous horizontal slot (small cam). A very hard sequence up the wall (passing an expanding flake - microwires) is made to less steep ground giving a pleasant finish. Belay on a tree.

2019 C Matheson

6 Electrolysis HVS 5a 54m

Start directly above the holly tree on the grass terrace. Belay out right on *Cobra*.

1 30m 4b Climb up mossy slabs on the left of a light-coloured wall until they steepen, then traverse diagonally right, crossing *Cobra*, to belay on the far side of an obvious large block.

2 24m 5a Step off the block and climb flakes to a short steep wall, then finish up the right edge of a square-cut chimney.

Spring 1979 A Hyslop, J Hyslop

7 Cobra HVS 5a 42m

An exposed outing, climbing up the steep central section of the crag. Start on the grass terrace above the holly and 8m to the right, below an obvious grassy grooveline, next to a good nut belay.

1 30m 4c Climb the groove until it steepens into a corner near the top. Follow the obvious traverse line to the right, on large flat holds, until a steep wall leads to a small ledge near a nest.

2 12m 5a Follow the line rightwards, past a sapling below the bulges, until some bold moves can be made through the only break, to reach a grassy terrace.

Aug 1959 AC Cain, M Tweed, P Shotton, E Tweed

8 Cobrantula VS 4c 50m

The first section of *Cobra* combined with the finish of *Tarantula* gives a direct way up the crag, following the obvious diagonal grassy break.

9 Albatross E1 5b 54m

A poor strenuous route. Start on a mossy ledge, just below and left of some red paint daubings on a smooth black wall 6m above the ledge.

1 18m 5b Ascend directly, until beneath an overhanging groove. Swing left across to a heathery hand-traverse to reach a ledge with a birch tree.

2 13m 5a Climb the groove behind, trending right to a ledge. Step down right to a break in the overhangs and move up to grass ledges.

3 23m Climb the wall behind, on the right of a square overhang on the arête, to gain a ledge. The bulging wall leads to the top (often wet).

14.06.1972 TW Birkett, MR Myers

10 P.E. E2 5c 36m

Very steep and strenuous, and mercifully, short. Start as for *Albatross*. Climb to overhanging rock. Step right and climb the wall directly using a thin crack just right of the obvious black overhanging groove (peg) to a flake on *Beautiful Losers*. Traverse left a couple of metres and climb the groove directly to reach the top.

Summer 1979 D Barr, A Hyslop

11 Beautiful Losers E2 5c 36m

An exposed traverse across the steepest part of the crag, requiring a bold approach rather than technical competence. Start below the red paint daubings as for *Albatross*.

1 18m 4c Scramble to the V-groove, which leads to the paint. At the top of the groove, step to the right on to a large sloping ledge. Walk a couple of metres right, until it is possible to move up to a similar ledge (old peg).

2 18m 5c From the left end of the ledge, traverse leftwards, and up into a niche below the overhangs. Now traverse strenuously leftwards (peg) to gain a niche with a large loose block in the floor. Easier climbing leads to the top.

Apr 1974 A Liddell, G Tinnings
(1 pa) FFA J Lamb 28.04.1974

12 Head Over Heels E2 5c 36m

A steep pitch with some atmosphere, which rises directly from the stance at the top of pitch 1 of *Beautiful Losers*. Start 6m right of *Beautiful Losers*.

1 12m 5a Up the dirty overlapping walls to the sloping ledge on *Beautiful Losers*; continue right to the belay. P1 of *Beautiful Losers* gives cleaner and better climbing.

2 24m 5c Climb the left-slanting groove by following a steep crack (peg) to a junction with the traverse of *The Lemming*. Climb the steep mossy scoop above.

01.08.1978 D Knighton
(1 pa) FFA D Knighton

13 The Lemming HVS 5a 39m

Good climbing, taking a left-slanting traverse line starting at a small birch tree 18m right of *Beautiful Losers*. Climb up past the tree and left to a sloping gangway; follow this to a steep wall. Climb directly to a ledge below an overhanging niche. Move left, and up a steep little wall to a crack on the left. Step down and across to mossy ledges which lead to an arête. Finish up this.

05.06.1973 MR Myers, CW Brown

14 The Asp VS 4c 51m

This dirty route follows a right slanting break, rising from the start of *The Lemming*.

1 21m 4c From the tree, traverse 5m left to the foot of a groove. Climb this, moving right at the top onto a wide slab. Move over an overlap into a recessed slab: Belay down to the right.

2 20m 4b Step right, and follow the right-slanting break, until it gets steep. Move left to a small ledge and climb the vague groove above to a large ledge.

3 10m The wall to easy ground.

07.06.1970 N Allinson, NJ Soper, D Miller

To the right the crag now becomes very vegetated and broken.

15 The Girdle Traverse E2 5b 121m

Take a line from the top of pitch 1 of *Chrysalis*, following the traverse of *Tarantula* and *Cobra* (4c). Down and across the steep wall, reversing the hand-traverse of *Albatross* (5b), descend and follow pitch 1 of *Beautiful Losers* (4c) to the stance. Move right and ascend, crossing *The Lemming* to join *The Asp* (4c). The arête on the left of pitch 2 of *The Asp* is followed to the top (5a).

01.07.1972 MR Myers, TW Birkett, CW Brown

From the top of *Raven Crag* a small clean crag will be seen to the right, at about the same level,

and a few minutes walk away. The following route climbs this.

16 **Pussies Paradise M** 42m

Start up some boulders that lean against the foot of a quartz-marked rib.

1 18m Climb the boulders and continue up the steep rocks to a big ledge and belay.

2 12m Scramble over ledges to the left.

3 12m A rising traverse to the left, onto the face, then straight up to the top.

24.04.1954 AM Wood-Johnson, C Egan, E Wood-Johnson

Long Crag

OS Ref: **SD 316 005**

Alt: **260m**

This is the steep gully wall splitting the rugged fellside ½ kilometre right of [Raven Crag](#). It forms a distinctive notch in the skyline of Holme Fell when seen from the road by Yew Tree Farm, from where the prominent pinnacle in the gully bed can also be seen.

Grades

Approach

From the bridge at the start of the Hodge Close road. Pass through the gate just beyond the bridge and follow the wall on the right to a second gate, where the wall on the left leads to an entry into the woods. Walk right above the wall for 400m to a tiny beck, then follow this steeply to the crag.

Lat/Lng: [56.926432073247, -9.237310154967](#)

Long Crag LHS

1 Lemon Sole E2 5c 15m

The first route starts below a steep wall containing a little niche at 4m, about 16m left of the pinnacle. A bold fingery route.

Climb up into the niche, pull out left through the overlap to reach a sloping hold, then finish direct.

Sep 1990 J Metcalf, I Cooksey, M Radtke, S Kaye

2 Orifish Fish E2 5c 15m

Another sparsely protected route. Enter the niche of [Lemon Sole](#), then pull out right (peg). Climb steeply up the shallow groove above the niche to finish.

Sep 1990 J Metcalfe, M Radtke, I Cooksey, S Kaye

Long Crag RHS

3 Troublesome Bloater E4 6a 12m

Behind the pinnacle is a sharp, prominent arête. Climb the left side of the arête (poor peg) to reach the easier-angled upper section. Rather committing.

Sep 1990 I Cooksey, J Metcalf, M Radtke, S Kaye

4 Niggeling Polyp E2 5c 12m

A right-hand start to the arête, utilizing two small slots left of *Fishy Fingers*.

Sept 1990 J Metcalf, V Metcalf

5 Fishy Fingers HVS 5a 13m

The delightful curving crack 2m right of the arête.

Sep 1990 J Metcalf, V Metcalf

6 Red Snapper E1 5b 12m

Pleasantly delicate. 5m right of the arête gain the protruding ledge at 2m, then climb the wall above (peg).

Sep 1990 J Metcalf, I Cooksey, M Radtke, S Kaye

Yewdale Pinnacle

Yewdale Pinnacle All four arêtes of this square-based pyramid have been climbed; the hardest of these, facing down the gully, was originally graded Severe and strenuous. In more recent years the faces in between have been climbed, but few details are available.
